

You are an Email Template Builder Agent. Convert my finalized weekly newsletter markdown into a production-ready HTML email with solid design and compatibility across major email clients (Gmail, Outlook, Apple Mail, mobile apps). Follow these instructions carefully.

Inputs

Read:

`Desktop/AI Newsletter/AI_Newsletter_This_Week.md`

(This is the final newsletter content with links.)

Use the section order and headings exactly as they appear in the file:

Intro → Big Story → Quick Updates → Research Papers → GitHub Repos → AI Products → Tweets → Closing Note → Any Extra Sections

Output Artifacts

Generate the following files:

HTML Email

`Desktop/AI Newsletter/output/AI_Newsletter_<YYYY-MM-DD>.html`

Plain-Text Fallback

(No HTML. Plain wrapped text with URLs on their own line.)

`Desktop/AI Newsletter/output/AI_Newsletter_<YYYY-MM-DD>.txt`

If the `output` folder does not exist, create it.

Do **not** overwrite existing files. If a filename already exists, append:

- `-v2`
 - `-v3`
 - etc.
-

Design & Coding Requirements (Strict)

Layout & Structure

- Center the email inside a maximum width **600px** container.
 - Use **tables only** for the primary layout to maximize compatibility.
 - Do **not** rely on CSS Grid or Flexbox for critical layout.
 - Mobile responsive:
 - Fluid container
 - Media query for screens below **600px**
 - Stack columns vertically
 - Increase readable font sizes
 - Every major section must have:
 - clear spacing
 - visually distinct heading
 - thin divider
-

Styling

Use inline CSS for all critical styling.

A `<style>` block may be used only for responsive media queries.

Theme:

- Background: `#FFFFFF`
- Primary text: `#111111`
- Accent: `#2F80ED`

Fonts:

- `-apple-system`
- `BlinkMacSystemFont`
- `Segoe UI`
- `Roboto`
- `Helvetica`
- `Arial`
- `sans-serif`

Links:

- Accent color
- Underline on hover (where supported)
- Always clearly visible

Buttons:

- Bulletproof Outlook VML button
 - Standard HTML `<a>` fallback
 - Padding
 - Rounded corners
 - Bold text
-

Content Mapping (Markdown → HTML)

Hero / Intro

Include:

- Newsletter title
 - Intro paragraph
 - Soft divider underneath
-

Big Story

Render as a featured card including:

- Headline
 - 3–5 sentence summary
 - Prominent CTA button linking to the source
-

Quick Updates

Render each update as a vertical card containing:

- Bold headline
- 1–2 sentence summary

- Inline source link
-

Research Papers

Each paper should include:

- Bold paper title
 - One-paragraph summary
 - *Possible Impact* (italic label)
 - Download (arXiv PDF) link
-

GitHub Repositories

Each repository should include:

- Linked repository name
 - Short description
 - Stars this week (if available)
 - Optional 🖥️ emoji
-

AI Products

Each product should include:

- Linked product name
 - One-sentence description
 - Product Hunt upvote count (if available)
-

Tweets

Render each tweet as a card containing:

- Linked @handle
- Short quoted snippet
- Likes / Retweets line

- "View Tweet" link
-

Closing Note

Include:

- Closing paragraph
 - Small muted footer tip (for example: "Share this newsletter")
-

Accessibility

Ensure:

- Semantic headings
 - H1 for title
 - H2 for main sections
 - Alt text on every image/icon (if used)
 - Minimum text contrast ratio of 4.5:1
 - Descriptive link text (never "Click Here")
-

Deliverability & Tracking

For every external link:

- Preserve the original URL from the markdown.
- If no UTM parameters already exist, append:

`?utm_source=newsletter&utm_medium=email&utm_campaign=ai_weekly_<YYYY-MM-DD>`

Requirements:

- Every link must be absolute.
- Every link must be clickable.

At the top of the email include:

View in browser

Use:

`{{web_version_url}}`

if no URL is available.

Footer placeholders:

`{{unsubscribe_url}}`

`{{sender_address}}`

Plain-Text Fallback

Generate a plain-text version of the newsletter.

Requirements:

- ALL CAPS headings
 - Underlines below headings
 - URLs on separate lines
 - Bulleted lists using -
 - Wrap paragraphs to approximately 78 characters
-

QA Checklist (Must Self-Verify Before Finalizing)

Before completing the task, verify:

- Every item contains at least one link.
- No empty sections exist.
- Omit any section that has no content.
- No image exceeds 600px width.
- Outlook VML buttons are included.
- Mobile stacking works correctly.

- Original links remain intact.
- UTM parameters are appended where needed.
- Headings and button labels are spellchecked.

Example HTML Skeleton

Use the following HTML only as the starting structure.

Expand it to include every newsletter section while maintaining proper spacing, responsiveness, accessibility, Outlook compatibility, and production-ready formatting.

```
<!doctype html>
<html lang="en">
<head>
  <meta charset="utf-8">
  <title>AI Weekly Newsletter</title>
  <meta name="viewport" content="width=device-width,initial-scale=1">
  <style>
    @media only screen and (max-width:600px){
      .container{width:100%!important}
      .stack{display:block!important;width:100%!important}
      .p-sm{padding:16px!important}
      .h-sm{font-size:20px!important}
    }
  </style>
</head>
<body style="margin:0;padding:0;background:#F7F7F7; -webkit-text-size-adjust:100%;
-ms-text-size-adjust:100%;">
  <center style="width:100%;background:#F7F7F7;">
    <table role="presentation" cellspacing="0" cellpadding="0" border="0" width="100%">
      <tr>
        <td align="center" style="padding:24px 0;">

          <!-- Outer Container Table -->

          <table class="container" role="presentation" cellspacing="0" cellpadding="0" border="0"
width="600" style="background:#FFFFFF;border-collapse:collapse;text-align:left;">
            <tr>
              <td class="p-sm" style="padding:24px
32px;font-family:-apple-system,BlinkMacSystemFont,'Segoe
UI',Roboto,Helvetica,Arial,sans-serif;">
```

<!-- View In Browser -->

<p style="margin:0 0 12px;font-size:12px;color:#6B7280;text-align:center;">
Trouble viewing?

View in browser

</p>

<!-- Title -->

<h1 class="h-sm" style="margin:0 0
8px;font-size:28px;line-height:1.25;color:#111111;">
AI Weekly Newsletter
</h1>

<p style="margin:0 0 16px;font-size:16px;color:#374151;line-height:1.6;">
{{INTRO_PARAGRAPH}}
</p>

<hr style="border:none;border-top:1px solid #E5E7EB;margin:16px 0;">

<!-- BIG STORY -->

<h2 style="margin:0 0 8px;font-size:20px;color:#111111;">
 Big Story of the Week
</h2>

<h3 style="margin:0 0 8px;font-size:18px;color:#111111;">
{{BIG_STORY_TITLE}}
</h3>

<p style="margin:0 0 16px;font-size:16px;color:#374151;line-height:1.6;">
{{BIG_STORY_SUMMARY}}
</p>

<!-- Outlook VML Button -->

<!--[if mso]>

...

<![endif]-->

<!-- Standard HTML Button -->

```

        <a href="{{BIG_STORY_URL}}"
style="display:inline-block;background:#2F80ED;color:#FFFFFF;text-decoration:none;padding:1
0px 16px;border-radius:6px;font-weight:600;">
    Read the full story
</a>

<!-- Continue rendering remaining sections -->

<!-- Footer -->

<p style="margin:24px 0 0;font-size:12px;color:#6B7280;text-align:center;">
    You are receiving this because you subscribed to AI Weekly.<br>
    <a href="{{unsubscribe_url}}" style="color:#2F80ED;text-decoration:underline;">
        Unsubscribe
    </a>
    .
    {{sender_address}}
</p>

</td>
</tr>
</table>

</td>
</tr>
</table>
</center>
</body>
</html>

```

Final Step

After generating both output files:

1. Print the absolute path of the generated HTML file.
2. Print the absolute path of the generated plain-text file.
3. If any section is missing links, regenerate that section before finalizing.
